| Assessor | Richard Tohu | | |

This certificate has been issued as proof of training and evaluation completed for the type of training, equipment and/or procedures described above.

This training should be regarded as basic safe operation, core knowledge and skills training.

Training has included but was not limited to: Responsibilities and Duties under the Health and Safe-

Also covered was pre-operation inspection and start up procedure, function test of emergency controls, safe and efficient operation, common hazards and control measures, environment awareness and good practice to avoid incidents. Travel in both forward and reverse, maneuvering in a limited space, positioning the work platform at height, braking, stopping, parking and shut down procedures. Safely mount and dismount.

This basic training has not covered all possible emergencies or uses for this type of equipment or task. Accordingly, this is not an authorisation to operate or use a specific piece of equipment.

It is the PCBU's responsibility to ensure that users are familiar with specific machines and attachments, tasks, hazards, environments and procedures not covered in this basic training.

It is recommended that the PCBU implement Standard Operating Procedures (SOPs) to describe the minimum compliance required from workers.
